SUMMARY

I am a dedicated frontend developer with a strong focus on building responsive, visually appealing, and user-centered web interfaces. I specialize in React and Next.js, creating applications that combine clean, efficient code with modern UI/UX principles. I enjoy turning ideas into functional digital experiences, ensuring smooth performance across devices. With a passion for continuous learning and problem-solving, I aim to deliver high-quality solutions that improve usability and bring real value to users and businesses.

EDUCATION

Bachelor/Information Systems | University of Rwanda

2023– 2027

As a learner in Information Systems, I am developing the skills to understand how information flows, how systems integrate, and how technology can be used to solve real-world problems and improve decisionmaking.

Advanced level certificate/Mathematics-Economics and computer science | G.S KINIHIRA

2018 – 2022

Trained in mathematical and Economics and computer programming such as C, C++ and html and css. Completed with a score of 55/60 in national examination.

EXPERIENCE

Frontend Development Experience

I have practical experience creating responsive and user-friendly websites, including full ecommerce platforms. Through these projects, I gained strong skills in React, Next.js, Tailwind CSS, and API integration. I learned to turn UI designs into functional interfaces, enhance performance, and write clean, maintainable code while improving my problem-solving and attention to detail.

SheCanCode Frontend Development Trainee (September – February)

Participated in an intensive training program focused on modern frontend technologies and industry-standard practices. Gained hands-on experience with HTML, CSS, JavaScript, and React while working on real project tasks, building responsive interfaces, and collaborating with peers in group assignments. Strengthened problem-solving skills, version control workflow (Git/GitHub), and the ability to translate design mockups into functional user experiences. This program enhanced my confidence and readiness to contribute to professional frontend development teams.

SKILLS

- Good communication
- Excel
- Soft skills
- Time management
- Good team player
- Microsoft office

ACTIVITIES

- Certificate of completion of Advanced Frontend Web Development Program at SheCanCode BootCamp skills in UI/UX, TailwindCSS, Typescript, Reactjs and Nextjs, under the digital Skills for Employability(DSE)Program in Igire Rwanda Organization
